

The Premier Enabler of Digital Business

We provide cross-functional solutions with offerings that span an integrated set of technical domains. By working between the business and IT, we can facilitate alignment, reduce functional silos, and focus on business objectives.

## Meeting the customer where they are...

### **How our approach works for your organization**

When it comes to enterprise integration services, putting the customer first is not enough. Beyond simply adhering to a process, EVOTEK meets a greater challenge: following a build-out process while being operationally flexible enough to meet the customer in their current flow.

The EVOTEK process is designed to do just that—to meet you where you are, on any build, and at any stage of development. We aren't limited by ideas of where your company should be to work on your project. Regardless of your current development stage, we can provide the guidance and next steps that will help you move forward and avoid development pitfalls.

# Mapping the Link between **Technical** Infrastructure and **Business** Architecture

## **Equipped to drive results**

Our architects and engineers are uniquely equipped to enable customers while driving business results. Our approach aligns the organization by encouraging cross-team engagement between the business, technology, regulation, and others.

We then recommend offerings that span an integrated set of technical domains. This level of stakeholder visibility plus integrated technical domains reduces siloed activity, toolsets and shadow IT, and improves resource utilization and efficiency.

## **Advisory to Execution**

By taking the time to understand your business, we create a bridge between the business and technical execution. The result is fewer errors, a lower total cost of ownership, and a more successful development project.

## **A clear path to integration**

Whether you need to begin with a Program Assessment or a Strategic Roadmap, we provide the rapid and efficient execution required to compete in today's transformation climate.

### **Advisory Services** ●

Multi-Time Executive Practitioners providing oversight, mentorship, and expert execution

### **Technology Solutions** ●

Experienced practitioners providing well architected and engineered solutions

### ● **Strategic Sourcing**

Optimizing the cost of technology acquisition

## Transform your **Network** and Deliver Reliability

### Experience Driven Transformation

Whether you are supporting your employees, guests, fans, crowds, students, faculty, patients or shoppers, technology has changed how we consume. Expectations of speed and reliability in our hyper-connected era is higher than ever.

Our team of seasoned Networking engineers and architects can help you navigate these hurdles and keep up with the ever-changing networking technology landscape.

### We can help.

Users expect to interact with organizations and consume services on their terms. Our team of mobility engineers can custom design high-performing Wi-Fi networks to deliver world-class user experiences.

### Network Offerings

- Network Planning, Design, and Operations
- Network Automation
- Network Assessments
- Network Architecture as a Service
- Network Security Assessment
- Network Traffic Analysis and Monitoring
- Improved Business Results
- Accelerated Adoption
- Predictive Modeling
- Site Surveys
- Mobile Infrastructure
- Mobile-First Access Switching & SD-WAN
- Secure Access Service Edge (SASE)
- Micro/Macro Network Segmentation User Experience

# Strengthen Your **Security** Posture in a Constantly Changing Threat Landscape

## **Experience Counts. Methodology Matters.**

Our methodology was developed by our team of experienced cybersecurity leaders, based on their years in the trenches, implementing world-class security programs.

This methodology leverages existing resources, tools, and processes wherever possible and identifies other areas that have opportunities for modernization.

## **Security Offerings**

- Security Program Assessment
- Ransomware Assessment
- Readiness Assessments & Advisory
- Executive Advisory Services
- vCISO Services
- NIST CSF/RMF/800-53
- ISO 27001/2
- GDPR
- CCPA
- SOC 2
- HITRUST
- Platform Security Assessment
- Security Tools Evaluation
- Pen-Testing
- MSSP & SOC Services
- MDR
- Reactive IR Services
- Identity & Access Management
- Data Loss Prevention
- Incident Response
- Threat Intelligence
- Vulnerability Management
- Security Tool Rationalization
- Security Architecture as a Service
- Well-Architected Cloud Security

# Modernize your **Data Center**

## **Any Architecture, Any Vendor, Any Challenge**

After years of deploying custom hardware and static operational models, traditional data centers carry enormous technical debt. Innovation and automation must be at the heart of a next-generation data center.

## **We've been there.**

EVOTEK's Data Center practice offers expertise in architecture, design, and deployment of environments based on workload demand. With the movement towards software defined, automation and orchestration must be key.

## **Data Center Offerings**

- Enterprise Network
- Assess, Design, Implement, Validate
- Network Security
- Network Automation
- Software Defined Networking
- Enterprise Storage
- Architecture & Design
- Storage Automation
- Tiered Storage
- Software Defined Storage
- Enterprise Compute
- Converged, hyper-converged systems
- Embedded Security
- Server Automation
- Software Defined
- AI/ML Platforms
- HPC Clusters
- Enterprise Data Protection
- Architecture & Design
- Next-generation Data Protection
- Archiving
- Disaster Recovery

# Scale your **Cloud** Infrastructure with a focus on Performance and Security

## Delivering at the Speed of Digital

Your organization is a strategic asset to your customers. The platforms (infrastructure, software, data, security, policy, and pipelines) you invest in to deliver your value are critical in gaining a competitive edge. EVOTEK's differentiated approach, talent, and experience come together to engineer platforms that are scalable, leverage delivery in any model, and provide immediate value.

## Cloud Offerings

- Cloud Strategy Enablement
- Cloud Readiness Assessment
- Multi/Hybrid Cloud Design
- CI/CD Integration
- Infrastructure-as-Code
- Secure-by-Design
- Embedded Application Security
- Policy/Compliance-as-Code
- Compliant Cloud Design (HIPAA, CMMC, PCI-DSS)
- Security Architectural Assessments
- Containerization and Platform Modernization
- Ephemeral Workload Management
- Container Adoption Planning
- Kubernetes Configuration and Deployment
- CI/CD Pipeline & Automation
- Full Stack Automation – Build, Test, Deploy
- Immutable Deployment Design
- Site Reliability Engineering
- Tools Rationalization, Implementation, and Optimization

# Communications

Reimagine how you communicate

## Cultivate greatness and optimize collaboration

Whether you're searching for the perfect solution to a frictionless customer journey or progressing communications internally, EVOTEK's experts can help. We negotiate the best rate and manage the project lifecycle. Unified Communications as a Service is at your fingertips.

## Finding a Signal Through the Noise

Don't let the noise of multiple vendors keep you from implementing the right solutions for your business and technology needs. We can be your advocate.

## Communication Focuses

**VOICE:** Our teams work together to provide an unparalleled network of leading industry suppliers.

**CONTACT CENTER:** Customers can communicate with clients 24/7, any time, anywhere through their channel of choice. We know how to make this radically convenient for you.

**COLLABORATION:** There are new ways to better facilitate and optimize group work to engage internally and externally. Whether it's in-office or remote, we can find the right tools for your work environment.

**VIDEO:** Finding the right solution to enable flexible video conferencing throughout your organization is no easy task. EVOTEK simplifies the process.

**CONNECTIVITY:** EVOTEK can help you understand the applications currently in use and how your users consume them. From there, we can design a network that maximizes utilization and performance.

## Viewing the Future of IT - **EVOTEK Labs**

### **The Emerging Tech Challenge**

As an IT leader, the challenge of creating the future falls on your shoulders now more than ever. Endless tactical urgencies give you little time to think strategically.

How can you sort through the barrage of new technologies and separate truth from hype? These issues are frustrating. That's why we built EVOTEK Labs.

We enable your team to map out an emerging tech strategy that focuses on today's needs with an eye on tomorrow's opportunities.

We'll spot and evaluate new solutions that mainstream offerings can't solve through Emerging Tech Forecasts, Labs Advisory Services, and Emerging Tech access.

Stop facing tomorrow's challenges with yesterday's solutions—start creating your future with EVOTEK Labs.

**Focused on emerging tech insight**  
– “where the puck is going”

**Working with the world's top research firms, academia, and early-stage start-ups**

**Partnered with 20 leading venture capital firms**

**Forecasting, Access, and Advisory for the IT landscape**
