

Cyber Risk Management Program

Ensure that your Cyber Risk Management program is strategically aligned with supported business functions and risk decisions are consistent with your organizations' goals, objectives, and risk tolerance.

In the current environment, Cyber threats, vulnerabilities, and impacts must be evaluated to determine where effort, budget, and priorities be applied to reduce or eliminate risks to the organization's operations or financial status.

EVOTEK Cyber Risk Management offers a proven cyber risk management framework that can align to your firm's Enterprise Risk Management objectives. EVOTEK can assist your firm in implementing a holistic cyber risk management approach that defines your risk management program's Framework, Program, Policies, and Procedures based on the organizations' strategic vision and goals.

Business Challenge

The modern Risk and Threat environment is constantly changing. Too frequently, organizations are caught off-guard because they haven't updated or evaluated their Cyber Risk Management Processes (Risk Framing, Risk Identification, Risk Assessment, Risk Response, and/or Risk Monitoring) to ensure alignment to organizational strategic goals and business priorities or to account for the changing threat landscape.

Our Cyber Risk Management offering is built to address these challenges by assisting your firm in implementing Risk Framing, Risk Appetite definition, and Tolerance.

A Proven Solution

Our approach can identify critical gaps and accelerate the maturing of existing Cyber Risk Management programs and ensure the corresponding Security Governance and Policies are aligned to the organizations Risk Appetite and Tolerance. Our offering will benefit the entire organization by optimizing decisions, policies, and processes.

EVOTEK's team has first-hand experience with the challenges our customers face – Risk Framing, Identifying Risk, performing Risk Assessments, managing appropriate Risk Response, and monitoring Key Risk Indicators (KRI). This experience provides a holistic understanding of your organization's challenges.

Solving Challenges

EVOTEK engaged with a technology company that utilized our Executive Advisor's to perform implement Cyber Risk Management framework. We assisted them to achieve success by focusing on their Enterprise Risk Management process and aligned their cyber risk management to business priorities and strategic goals. We were able to help them rebuild their Cyber Risk Management program by conducting workshops to identify and contextualize ELT stakeholder risks to create a consistent common operating model. We assisted them with re-prioritizing their alerting and monitoring KRI's and revised their risk framing and assessment capabilities.
